

ELIZABETH BIRNIE

**Jackson Hole Classical Academy**

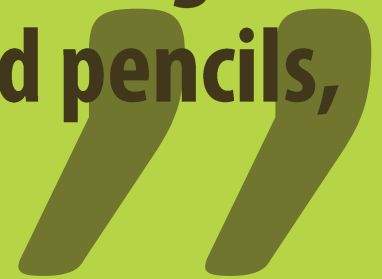

Salvia purpurea & Sida  
Bambusa

**For this project, students observed scientific illustrations of flowers. The Wyoming State Flower, the Indian Paintbrush, and the dandelion are both flowers that are familiar to students living in Jackson Hole.**

**Kindergarteners were encouraged to look at the different leaf shapes on both flowers and draw the different types of roots. Students enjoyed mixing colors and layering a variety of mediums for this project using colored pencils, paint, as well as black pens.**
